**A WORLDWIDE PROBLEM**

A diver in a blue wetsuit and yellow fins swims horizontally across the frame, carrying a silver tank. Bubbles rise from the tank. Below, a coral reef is visible, with some areas appearing dead and white. The background is a deep blue ocean.

## MOORINGS

*we have developed fixed anchor points*

*from concrete blocks are poured, which we place next to the reefs*

*buoys are attached to the blocks where boats can anchor*

*anchoring into the reef is avoided - the reefs stay alive*

*Concrete blocks are produced on site*

## NEMO-PI

*Our digital underwater weather station*

*allows us to collect and evaluate data  
on water pollution and other physical  
and chemical parameters*

*Open Source*

*developed by Save.Nemo e.V.*

## NEMO-LAB

*world's first mobile coral breeding station*

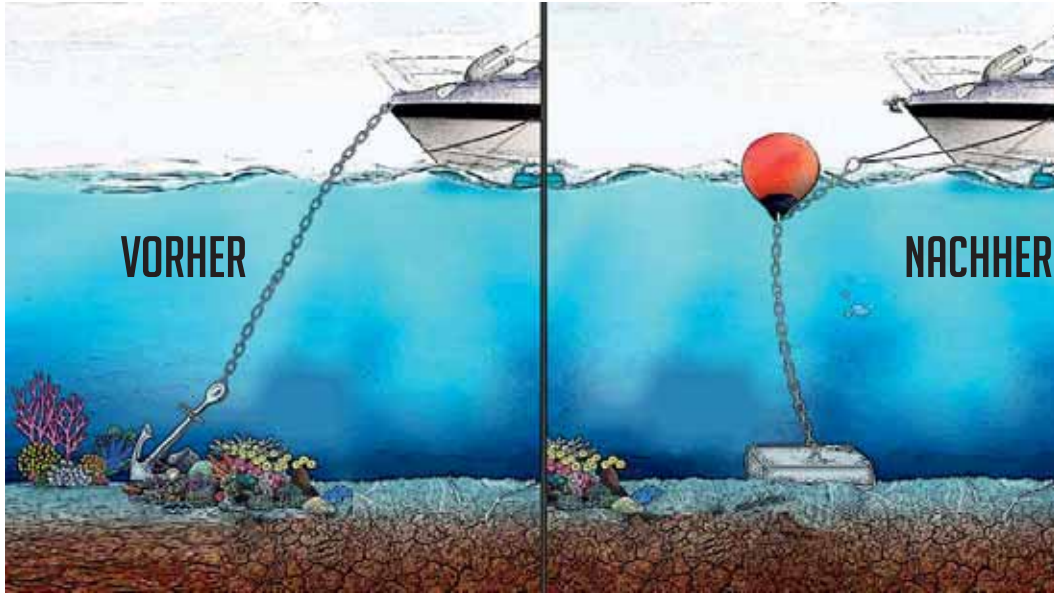

*Corals can be cloned on site gently  
and at a breathtaking speed*

*Bildungsprogramme für die lokale Bevölkerung*

*Municipal Beach Clean-Ups*

*wide cooperation with cities and municipalities*
